Aim

To design and develop a simple yet structured HTML5-based website using various essential HTML5 tags and features that demonstrate a clear understanding of semantic elements and formatting techniques.

Description

This exercise involves creating a simple HTML5 website named 'StarVerse'. The website consists of two web pages: Home and Today's Horoscope. It demonstrates the use of HTML5 semantic elements, headings, paragraphs, hyperlinks, tables, lists, CSS styling, and navigation links. The website follows proper formatting and uses suitable background and text colors to provide a clean and user-friendly interface.

Procedure:

- Create index.html and horoscope.html files.
- Add the HTML5 document structure.
- Design the header and navigation menu.
- Insert headings, paragraphs, tables, lists and hyperlinks.
- Apply internal CSS for formatting and colors.
- Link both pages together.
- Execute the files in a web browser and verify the output.
